begin the first and endocarditis in the registration area in 1914 numbered 99,534, or 150,8 per 100,000

population. The death or mortality rate from this cause shows a marked increase as compared with 1900, with it was only the cooperation. speakers, C. O. Ormsbee, Capital City 123.1 per 100,000.

Da Vinci's Career.

Leonardo da Vinci was a great Italcivil and military engineer, a scientific Uffizi at Florence, and "The Virgin of the Rocks," in the British National gallery. His great painting of the "Lord's Supper" was finished in 1499. The original has been wholly defaced; but, judging from copies, this work is unirersally regarded as one of the greatest ever produced. In 1499 he painted del Giocondo. In 1507 he painted a Madonna and child.

His extant works are few, and some of those attributed to him are believed to have been executed by his pupils. He died May 2, 1519.

Moths That Eat Your Clothes.

The little clothes moth is grayishyellow. It is not the winged moth that eats up clothing. The caterpillar is the real perpetrator of all the damage done to garments. All the flying moth does is lay eggs, for it has no mouth for food. But the winged moth our clothes, for each lives in a little case or jacket adapted to its growth in a curious way. Without leaving its case the clothes worm makes silts and inserts gores on the sides and also lengthens its facket to meet its needs. The fresh material needed comes from the clothing wool for or feathers on the clothing wool for or feathers or the clothing wool for the clothing wool for or feathers or the clothing wool for the clothin the clothing wool, fur or feathers on most continuous, there having been but its almost invisible eggs for this very a decline as compared with the years purpose.-Exchange.

His Handicap.

On his first visit he looked around for a possible partner at a game and cians in making reports to registration approached a stout gentleman whose deportment suggested social standing.

"Certainly, sir," replied the latter in answer to the newcomer's invitation. Then, as they approached the first tee, he went on: "By the way, I'm a four man. What are you?"

The novice was startled, but after a minute's consideration he said: "Foreman, are ye? Well, I'm a straw hat manufacturer."-Beck's Weekly.

When Jackson Dined.

When Colonel Davy Crockett was a member of congress and was at his about the dinner hour in Washington. He said the common people ate dinner tration area. at 12, the next above them at 1, the cabinet at a and the vice president at 6.

"But when does the president dine?" "What! Old Hickory?" said Crockett, anxious to fix a time that would suit his idea of Jackson's greatness. "Well, be doesn't eat till next day!"

Removing Stumps.

The German method of removing ed somewhat from year to year.

Diabetes was the cause of 10,666 deaths, or 16.2 per 100,000. The rate stumps is simpler and less dangerous than our way. They bore a hole in the stump and pour into it equal parts of from this disease has risen almost connitric and sulphuric acids. After a few weeks the largest stumps of hard wood are eaten by the acid and easily crumbled with a pick.-New York Times.

Kept His Word.

Condemned Murderer (to lawyer)-You said you could get me off with a life sentence, and here I am to be electrocuted in a week. Lawyer-That's all right. You will be imprisoned for life. won't you? And only a month, instead of long, weary years. Be reasonable, man .- Boston Traveler.

His Cure.

A man who married a widow has inrented a device to cure her of eternally praising ber former husband. Whenever she begins to descant on his noble qualities, this ingenious No. 2 to wish he had not died!"

A Waiting Mansion.

Perhaps there is a mansion in heaven that will always be empty-a mansion waiting to receive those who in their youth never snubbed their anxious parents.-J. J. Bell.

Everybody cordially invited. berculosis, there has been a most marked and gratifying decrease during recent years in the mortality from this scourge of civilization. In only a decade-from scarlet fever-were together responsible ian painter and sculptor, architect and 1904 to 1914—the death rate from tuberculosis in all its forms fell from 200.7 adults and children, or 23.7 per 100,090, inventor and a man of universal gen- to 146.8 per 100,000, the decline being in the registration area in 1914, the rates tus. He was born in Vinci, near Flor- continuous from year to year. This is for the three diseases separately being ence, in 1452. Two of his earlier pro- a drop of more than 25 per cent. Prior 10.3, 6.8 and 6.6, respectively, 4n 1913 ductions are still extant-"The Adora- to 1904 the rate had fluctuated, starting measles caused a greater mortality than tion of the Magi," in the gallery of the at 201.9 in 1900. Even yet, however, either of the other diseases, but in 1914 tuberculosis has the gruesome distinction of causing more deaths annually than any other form of bodily illness except heart diseases, and over 40 per cent | more than all external causes—accidents, the much more dreaded scarlet fever. homicides and suicides combined.

Pneumonia (including bronchopneumonia) was responsible for 83,804 deaths in the registration area in 1914, or 127 per fever in 1914 were the lowest in 15 his celebrated portrait of Mona Lisa 100,000—the lowest rate on record. The years, while that for whooping cough mortality rate from this disease, like was considerably above the lowest recthat from tuberculosis, has shown a orded rate for this disease 6.5 in 1904, marked decline since 1900, when it was although far below the highest, 15.8 in 180,5 per 100,000. Its fluctuations from 1903, year to year, however, have been pronounced, whereas the decline in the rate for tuberculosis has been nearly contin-

The only remaining death rate higher than 100 per 100,000 in 1914 was that from collisions between railway trains for Bright's disease and acute nephritis, and vehicles at grade crossings. The 102.4. The total number of deaths due death rate from railway accidents and to these maladies in 1914 was 67,545, injuries is the lowest on record and more than nine-tenths of which were shows a most marked and gratifying decaused by Bright's disease and the re- cline as compared with the rate for 1913, mainder by acute nephritis. The mortality from these two causes increased from more more pronounced drop from the is the source of mischief "higher up." 89 per 100,000 in 1900 to 103.4 in 1905, average for the five-year period 1906for its eggs hatch hungry little worms. since which year it has fluctuated some- 1910, which was 15 per 100,000.

a curious way. Without leaving its filled 52,420 graves in 1914. Of these case the clothes worm makes slits and deaths, 19,889, or almost 38 per cent, or near which the crafty moth has laid two years-1906 and 1911-which showed immediately preceding. It is possible that at least a part of this indicated increase is due to more accurate diagnoses and greater care on the part of physi-

> officials. Diarrhea and enteritis caused 52,407 deaths in 1914, or 79.4 per 100,000. This rate shows a marked falling off as compared with the rate for the preceding year, 90.2, and a very pronounced decline as compared with that for 1900, which was 133.2. Nearly five-sixths of the total number of deaths charged to these causes in 1914 were of infants under two

> years of age. Apoplexy was the cause of 51,272 deaths, or 77.7 per 100,000. The rate from this malady has increased gradually, with occasional slight declines, since

1900, when it stood at 67.5. Arterial diseases of various kindshome in Tennessee some one asked him, atheroma, aneurism, etc.—caused 15,044 deaths, or 22.8 per 100,000, in the regis-

No epidemic disease produced a death merchants at 2, the representatives at rate as high as 18 per 100,000 in 1914.

5, the senators at 4, members of the cabinet at a and the vice president at 6.

—which are classed together in the statistics, but practically all of which are of diphtheria-numbered 11,786, or 17.5 per 100,000, in that year, the rate having fallen from 43.3 in 1900. This decline of nearly 50 per cent is relatively greater than that shown by any other important cause of death. The rate has not fallen continuously, but has fluctuat-

tinuously from year to year since 1900,

when it was 9.7 per 100,000. The mortality rate from typhoid fever has shown a most gratifying decline since 1900, having decreased from 3.59 per 100,000 in that year to 15.4 in 1914, or by 57 per cent. This decline has been ilmost as great, relatively, as that for diphtheria, and has been greater than that for any other principal cause of death. The total number of deaths due to typhoid fever in 1914 was 10,185. The

Saves Boy From Grave

Mrs. Jennie Bowen of Meredith, N. H., crites this kind of letter: "You have helped my little boy. He would have been in his grave before long."

Some ayuntoms of worms are: Deranged stomach, swellen upper lip, sour stomach, offensive breath, hard and full belly with occumerely says, "Poor, deer man-how I sional gripings and pains about the navel, pale

sional gripings and pains about the navel, pale face of leaden tint, even heavy and dull, twitching syclids, itching of the nase, itching of the rectum, short dry cough, grinding of the tech, little red points sticking out on tongue, starting during alsep, alew fever.

If you have the least suspicion that your child is troubled with Trade Mark shomach werens or pinworms, put him on the road to good health by using Dr. True's Elivit, the Family Laxative and Worm Expeller. This remedy has been on the market for over 50 years. Good for adults also. At all dealers', 55c, file and \$1.00. Advice frem

Lime Treatment in Tuberculosis

In the May 25, 1912, issue of the Journal of the American Medical Association appeared this statement concerning calcium (lime) medication in the treatment of pulmonary tuberculosis (consumption):

"Under the systematic, continued and persistent regime of calcium assimilation, Van Gleson has seen a number of his patients improve, undergo an exudation or partial consolidation in the lung, which then resolving would appear to contribute to the walling off and closing of the lesions. Hand in hand with this course of events, the sputum clears up of tubercle bacilli, which finally disappear, and the patients are discharged with healed pulmonary tuberculosis."

berculosis."

Ethical medical journals seldom speak so positively about a remedial agent, yet this testimony coincides with that from many consumptives who have secured like results through the use of Eckman's Altern-

through the use of Ecomman a Attentive.

Since calcium is a constituent of this remedy for pulmonary tuberculosis and allied throat and bronchial affections, its healing power may in some measure be attributed to the manner in which this element is so combined with other ingredients as to be easily assimilated by the average person and it does not irritate the stomach. the stomach.

Eckman's Alterative contains no opiates, narcotics or habit-forming drugs, so it is safe to try. If your druggist is out of it, ask him to order, or send direct to

Eckman Laboratory, Philadelphia.

marked decrease in the mortality from this disease gives emphatic testimony to the effectiveness of present-day methods, not only of cure but of prevention. The efficacy of improved water supply and sewerage systems, of the campaign against the fly, and of other sanitary ecautions is strikingly shown by the reduction of the typhoid mortality rate to the extent of more than five-ninths in

Whooping Cough, Measles and Scarlet

Fever. The principal epidemic maladies of childhood-whoping cough, measles and for no fewer than 15.617 deaths of both whooping cough had first place. In every year since and including 1910, as well as in several preceding years, measles has caused a greater number of deaths than The mortality rates for all three of these diseases fluctuate greatly from year to
